KEY FINDINGS
Issue: No driver termination (`driver.quit()`)
CRITICAL
What was identified No driver termination (`driver.quit()`)
Why it matters Leaves Chrome processes running, consumes memory/CPU, and can exhaust system resources on CI runs.
Recommendation Wrap the Selenium usage in a `try ... finally` block and call `driver.quit()` in the `finally`.
IMPROVEMENT AREAS
AI REVIEW SUMMARY
* **Overall quality:** The script demonstrates a functional Selenium flow but lacks the structure, safety, and scalability expected in a professional test automation suite. * **Strengths:** Clear naming (`sourceEle`, `targetEle`), correct use of `Actions.dragAndDrop`, and basic Selenium setup are present. * **Weaknesses:** No
