Day 2 Assignment: GitHub

Code Reviewer

GroqModel:

Input Page:

Output:

Review a pull request

Enter the repository, pull request number and code changes below. The n8n workflow will return review comments and suggestions.

STEP 1

Review input

POST /webhook/github-code-reviewer

Repository

example-org/platform-service

Pull request

2481

Code diff

required

```
diff --git a/src/example.js b/src/example.js
+const n = 3;
```

Your source stays within your configured n8n workflow.

Run code review ↗

Review complete. Findings are ready below.

STEP 2

Review result

COMPLETE

Review complete

Summary

The change is small and easy to understand.

Findings

- **Medium**: Add a test for the invalid input case.
- **Low**: Use a more descriptive variable name.

Recommended next steps

- Add the tests before merging the pull request.
